Appl. No. 10/797,294
Amdt. Dated February 18, 2009
Reply to Office Action of November 18, 2008

Amendments to the Claims:

This listing will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-21 (Canceled):

Claim 22 (Previously presented): A foldable head restraint which comprises
a first head restraint support having a first elongate portion for receiving a bun thereon;

a bracket;

a latch mechanism;

a torsion spring that biases the cam in the first direction; and

cable pin to which a first end of the torsion spring is attached,

the latch mechanism including a rotatable cam that can be selectively rotated independently of
the first head restraint support between a latched position in which a second portion of the first head
restraint support is engaged by an end surface of the rotational cam and thereby locked against pivotal
movement and an unlatched position in which the second portion of the first head restraint support
can pivot immediately over the cam.

Claim 23 (Previously presented): The foldable head restraint of claim 22, wherein the torsion spring has a second end that is attached to the bracket.

Claim 24 (Previously presented): The foldable head restraint of claim 23, wherein the cam is installed on a cam pivot pin and the torsion spring is mounted on the cam pivot pin.

Claim 25 (Previously presented): The foldable head restraint of claim 24, wherein the cable pin is located at the first end of the cam and the cam pivot pin is located at the second end of the cam.

Claim 26 (Previously presented): The foldable head restraint of claim 25, further comprising a second stop, the second stop attached to the bracket.

Claim 27 (Previously presented): The foldable head restraint of claim 26, wherein the second head restraint support has a structure that engages with the second stop to prohibit motion of the second head support in a first direction.

Claim 28 (Previously presented): The foldable head restraint of claim 27, wherein the bracket has a first side and a second side with the first stop located on the first side and the second stop located on the second side.
